

**Whidbey West Water Association (WWWA)**

**"The goal of Whidbey West Water Association is to provide clean water at a fair cost, good service to our members, and to conserve our water supply for future generations."**

State ID No. 363146 / Island County Franchise No.327 / <http://whidbeywestwater.org/>

**Right-of-Way Information**

A 15' county right-of-way exists in front of each property. King Water has full authority to conduct maintenance operations such as digging, trenching, etc. as it relates to installation, service, and maintenance of our water system within this right of way.

If trees, shrubs, or flower beds are located within the right of way, they are fair game for disruption or removal to complete the required operation.

King water employees are conducting work at the behest of the water association. If King Water employees are working with equipment within the right-of-way and the owner has a concern, please politely ask the workers if you could speak to the supervisor about your concerns. This will likely involve a phone call to King Water or to one of the Board members.

Please recognize that the Board is neither responsible nor obligated to return the property to the previous condition. We will, on a case-by-case basis, provide modest compensation like grass-seeding and ground-leveling to alleviate the disruption, but this is only a courtesy and by no means an obligation if the evolution takes place within the right-of-way.

If you have any questions regarding this matter, feel free to contact a Board member of WWWA.
